# About Us.

## Introduction

A nationally owned company, incorporated in 2008, Manolos has since made its mark as a leading helicopter service provider.

We offer commercial charter and light to medium lift helicopter services, including operating the largest Medical Evacuation Service within Papua New Guinea. The company maintains two (2) operating bases, one in Lae, Morobe Province and the other in Tokua, in East New Britain Province.

Our dynamic team is led by Captain Jurgen Ruh who is the Chief Executive Officer and Chief Pilot. His vast experience in flying in some of the most rugged terrains in Papua New Guinea coupled with his extensive knowledge of PNG's unpredictable weather patterns and adherence to communicative, and cultural diversity, makes him the most knowledgeable individual in the industry.

# Mission & Vision.

## MISSION

Manolos Aviation is committed to:

- a) Providing reliable, cost-effective services delivered in accordance with authority rules,
- b) Working in an environment where safety is paramount,
- c) Facilitating and engendering a culture and continually improving the high standards with our staff in their quest for excellence.

## VISION

To satisfy our customers as a participant in nation building in providing quality helicopter charter services with a difference in Papua New Guinea

# Our Services.

Manolos Aviation can offer a variety of services to multiple industries, and for service with specific requirements, our operations and flight team are available to plan cost effective solutions.

## **PASSENGER CHARTER**

Drop off and pick up at remote locations outside the city, or just a shuttle service from Lae to NADZAB Tomodachi International Airport.

## **GOVERNMENT, INSTITUTIONS & BUSINESS**

Twin engine with spacious  
interior and cargo compartment.

## BELL 222 (Medevac Helicopter)

**Capacity:** 2 stretchers with medical  
personnel and 2 passengers

# Our Pride.

## HELICOPTER EMERGENCY MEDICAL SERVICES

Manolos Aviation runs the most extensive Helicopter Medical Evacuation (Medevac) Service in Papua New Guinea (PNG).

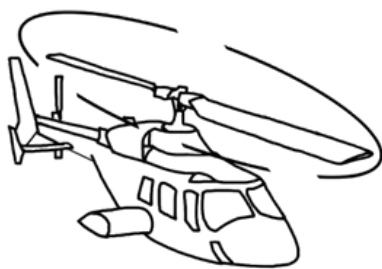

We have flown to over 3000 rural and remote locations than any other helicopter service provider. We maintain a medevac team with Nurses, Pilots and Doctor.

Our Medevac Operation is on standby, in Lae, Morobe Province, 7 days a week, with the ability to deploy a team within 20 minutes of a call out and reach the furthest patients within 2hrs.

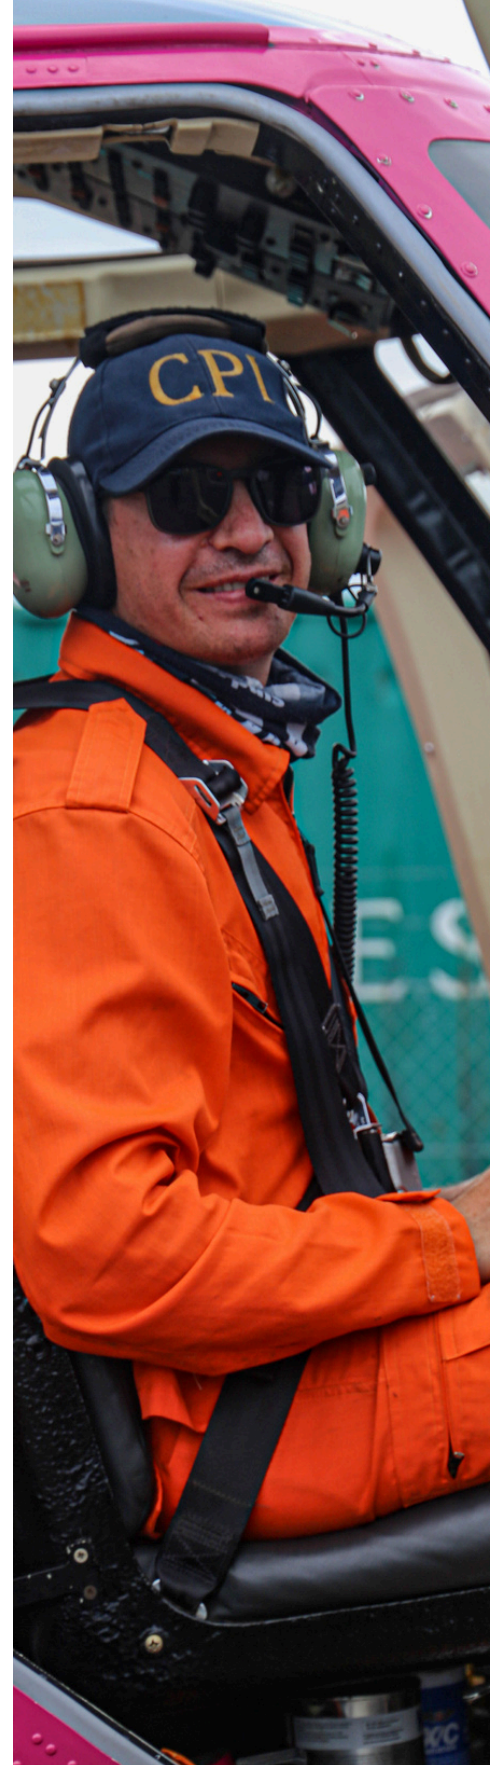

Our Medevac helicopters are fitted with emergency equipment suitable to stabilize and monitor patients in-flight, and can be configured to carry up to two stretcher patients or up to seven sit-up patients at any one time.

An important element of the Medevac Service is a program dedicated to women and infants who experience complications as a result of child birth. This Program is called Mountain Area medical Airlift (MAMA). Established as a joint partnership program with Provincial Governments and Manolos Aviation, the MAMA Medevac has since become the largest rural and remote medical support for women and infants in PNG.

Our determination to consistently achieve high quality standards of service & finding newer more innovative ways of operating is the driving factor behind our success.
